

Hello! Welcome to Room 118! My name is Tiffany Daly and I will be teaching Physical Science, Physics, and Chemistry this year at Lexington High School. I am excited to see all of my students in person or virtually! I hope that you are ready to learn, laugh and grow with me this year as we venture through many science topics like matter, energy, force and motion, chemical reactions and many more. We will be making observations, predictions and testing theories! Learning and working the way that Scientist do! See you on the 14th!

PERIODIC TABLE
Atomic Properties of the Elements

Expanded and color-coded periodic table showing atomic properties. The table is color-coded by groups: Alkali Metals (red), Alkaline Earth Metals (orange), Transition Metals (green), Post-Transition Metals (yellow), Nonmetals (purple), Halogens (blue), and Noble Gases (pink). It includes physical and chemical property indicators such as electronegativity, ionization energy, and atomic radius.
